

## **Information about the Study**

Hello, we are a team of students from Northeastern University doing a research project on data visualization.

We would like to begin by thanking you for making time to participate in this online research study. Your feedback is valuable and will help us assess different chart designs that depict growth over time.

The survey has timed questions, so when you start it, please make sure you have sufficient time to do it from start to finish (each question takes up to 90 seconds, and the next question will start automatically). Please try your best to estimate the values in the future. As you go about answering the questions, please do not use any calculators or writing instruments for calculations. For this research study, it's important that you do the math in your head using the charts as a visual aid.

The goal is not to get the exact right answer but to see if the visualizations help you with making estimates.
